📁 PROJECTS

Learnova – Learning Management System (LMS)

03/2026 – 03/2026

Tech Stack: HTML, CSS, JavaScript,
Python, Django, REST APIs, JWT
Authentication

📄 BRIEF SUMMARY

Motivated and detail-oriented Computer Science & Engineering student with a strong foundation in Python, Django, and modern web technologies. Skilled in developing responsive, secure, and scalable applications through impactful internships and real-world projects.

Proficient in core Python libraries such as NumPy, Pandas, and Matplotlib, with hands-on experience in data analysis, visualization, and backend development.

📁 INTERNSHIPS

IT GEEKS TECHNOLOGIES PVT LTD | IT / Computers - Software

Software Engineer Intern

05/06/2025 – 05/07/2025

Key Skills: PYT Javascript HT MySQL DJAN CSS NumPy
Pandas Matplotlib Proficient in front-end technologies including HTML, CSS, and JavaScript for building responsive and user-friendly interfaces. Skilled in Python programming and Django framework for developing robust and scalable web applications. Experienced in MySQL database design, query optimization, and data management. I received excellent training, and the trainers were highly skilled and supportive.

Shanti Infosoft LLP

Python Developer Intern

01/01/2026 – 30/03/2026 | Indore

Key Skills: HTML CSS Javascript Developed and styled responsive layouts, ensuring cross-browser compatibility and mobile-friendly design. Gained practical experience in front-end development workflows and debugging techniques. Delivered projects within deadlines, following given requirements and design specifications.

- Developed a role-based Learning Management System that allows administrators, teachers, and students to manage courses and attendance efficiently. The system provides secure authentication using JWT tokens and supports full course lifecycle management including course creation, editing, deletion, and teacher assignment. Teachers can manage their courses and view student data, while students can mark and track their attendance through an interactive dashboard. The frontend is built with HTML, CSS, and JavaScript, consuming Django REST APIs for dynamic data handling.

Mentor: Abhishek Gurjar | Team Size: 3
22/07/2025 – 10/09/2025

Key Skills: Django python html CSS my sql Project Link: https://github.com/Aman2728/django_project This project was a deep dive into Django's MTV architecture, database management with Django ORM, and implementing key features like:

- User authentication & secure login
- Product browsing and categorization
- Shopping cart & smooth checkout flow
- Blog integration & newsletter subscriptions
